

# VibraVid

## Social Media 3.0

Revolutionary financial technology combined with revenue sharing and artificially intelligent advertising. It's a new way of doing things on social. Get on board!

## Work & Play

You are already using the internet. Why not get paid for it?

## From B2C to P2P

The internet is evolving. VibraVid and BeatzCoin are at the forefront of a breakthrough economic model - a decentralized, blockchain-based social media streaming platform that rewards all its users.

## Fair & Square

A peer to peer sharing economy in which contribution is rewarded and advertising revenues are enjoyed by all participants.

## A Piece of the Pie

Advertisers have long concluded that videos are the preferred type of online content and have spent \$16 billion, worldwide, on online video ads last year (expected to grow to \$45 billion by 2021). And it pays off. The convenience of online shopping has resulted in a whopping \$2.3 trillion in global retail revenues alone (expected to grow to \$5 trillion by 2021).

## User Driven

Unlike traditional models, the VibraVid platform makes money from transaction fees alone. Users are the ones to pocket the advertising revenues based on merit.

## BeatzCoin

BeatzCoin is the currency used to transact on the VibraVid platform. All transactions, deals, products, services, bounties and giveaways are recorded on the blockchain ledger, eliminating the need for a middleman.

## Quality over Quantity

Top quality content producers earn the most. They earn their share by giving their fans the best of the best.

## P2P Paid Content

Creators can accept tips and donations. A cumulative series of micro payments helps them make a living doing what they love. They can rent out and sell their video and audio streams, subscriptions, event tickets and fan merchandise.

## Ad Opt Out

As a VibraVid user, you are given the option to exclude ads from the media you post and consume. Ads, like earnings, are optional. If you choose to exclude ads, you can still earn by supporting your favorite creators and partaking in their bounties and giveaways.

## P2P Paid Marketing

Creators can offer bounties and giveaways to fans and marketers who help them build a community of fans and followers. It's a two way street.

## Community Building

VibraVid is a brand new social streaming platform giving you the chance to build a community of beneficiaries. Create great content and share it together. Bring your friends on board, as well as people in the field whose content you enjoy. Grow together and share the rewards!

## Censorship Resistant

Creators and advertisers communicate and negotiate directly with one another and make decisions together as partners.

## Your Opinion Matters

VibraVid is a budding social project focused on community. Become a part of it. Share your ideas. Ask questions. Contribute.

## What is BeatzCoin?

BeatzCoin is the cryptocurrency used on the VibraVid social streaming platform.

## What is a cryptocurrency?

A cryptocurrency is a blockchain based token of value and a means of conducting and recording transactions.

## What is the purpose of BeatzCoin on the VibraVid platform?

BeatzCoin is bought and used to pay for video and audio content, marketing and advertising by users, creators and advertisers.

## Do I have to pay to watch videos on VibraVid?

No. As a social media streaming platform, VibraVid is free to use. However, content creators are given the option to sell their media (videos, songs, movies, subscriptions, events, merchandise, etc.) directly to fans. In those instances, you will have to own BeatzCoin to make purchases.

## Where can I buy BeatzCoin?

On the BeatzCoin website: <https://www.beatzcoin.io/>

## What else can I do with BeatzCoin?

In addition to buying songs, movies, event tickets and fan merchandise, you can use BeatzCoin to tip your favorite video and audio artists and buy ads to promote your own video and audio recordings. You can also save your BeatzCoin and earn dividends.

## Why not just use fiat currency?

Because cryptocurrency transactions are stored and processed on blockchain ledgers providing a high tech form of accounting. This results in more income for video and audio content creators.

## What is different about VibraVid compared to traditional video sharing platforms?

VibraVid is a decentralized marketplace where video and audio producers, advertisers and social media users meet to create and support great streaming content and share the rewards.

## How does VibraVid make money?

VibraVid retains a small percentage of each transaction.

## How can I earn BeatzCoin?

Through airdrops, bounties, content creation, publishing, promotion, sales, rentals, events, event tickets, fan merchandise, tips, crowdfunding donations and staking.

## What is staking?

Cryptocurrency staking is an alternative to cryptocurrency mining. Both methods lead to the creation of new coins. Mining cryptocurrencies requires special hardware. Staking, on the other hand, can be done using a simple desktop, laptop or mobile device.

## How does staking work?

You purchase Beatzcoin and store it in a digital wallet and instead of spending it, you save it and earn interest.

## What can I buy with BeatzCoin?

You can buy video and audio content, event tickets, fan merchandise and advertising; tip your favorite video and audio creators and support their crowdfunding efforts.
