

Making your TRX work for you and earn interest on what you make.

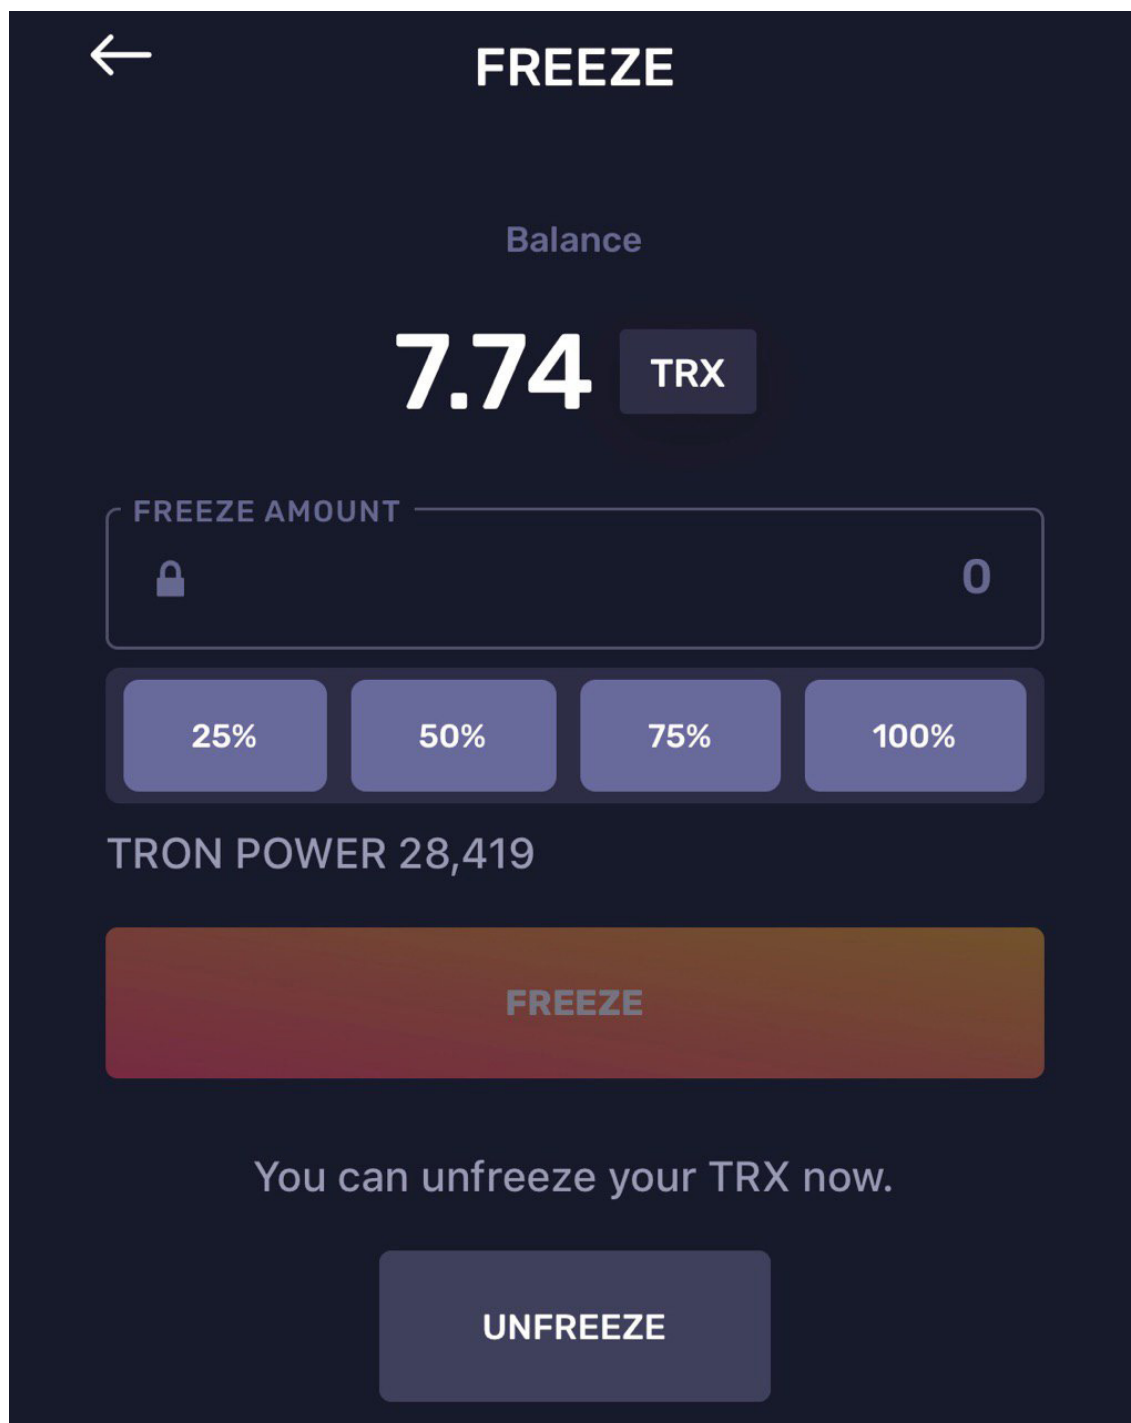

You can earn more TRX by “freezing” it and participating in Tron’s Super Representative elections. Tron’s system of governance is based on Super Representatives, or SRs being elected to create and implement policy for the protocol. The SRs are responsible for block generation and general upkeep of the blockchain. When the rewards are granted, the SRs spread TRX rewards to the voters as an incentive to freeze their coins and vote.

Just by voting in Tron’s Super Representative elections, TRX holders gain the ability to earn more TRX for doing literally nothing. Tron holders need to just make a wallet on Tronscan or use a product like TronWalletMe to vote for the SR of their choice and they can earn TRX every voting cycle. When you vote for BeatzCoin the TRX earned will be used to fund the and upgrade the VibraVid platform but BeatzCoin will match the rewards and spread them to the voters. All BeatzCoin voters will receive TRX and BTZC rewards.

When you are on the main screen, scroll down and a little find these icons.

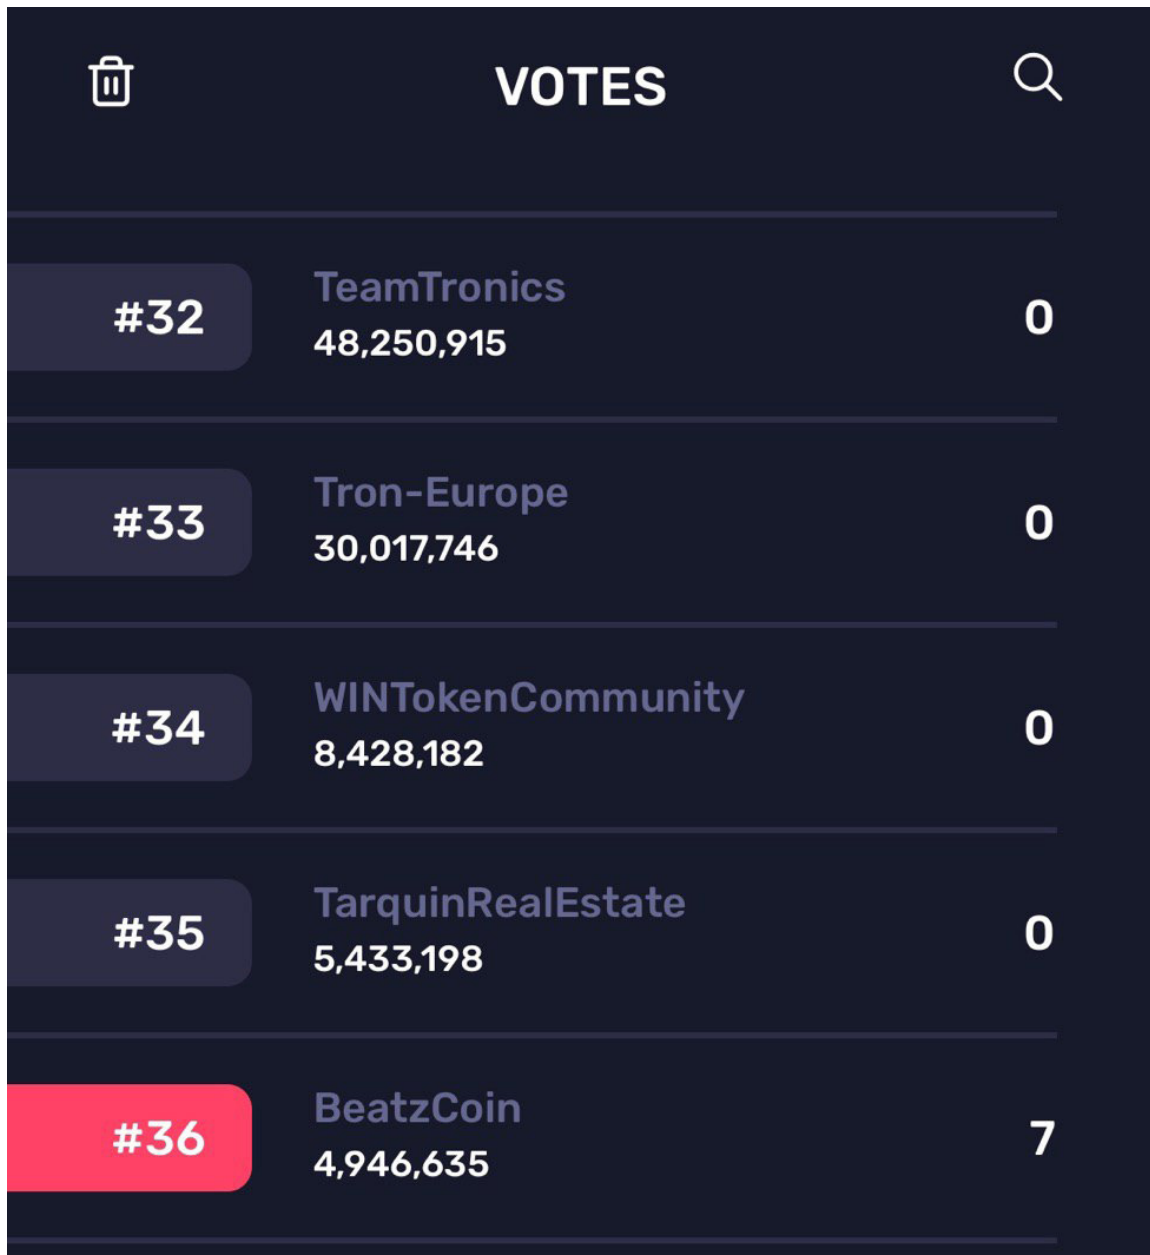

Select **'Freeze'** and you'll be brought this screen:

Note that once you freeze your tron, you won't be able to move or trade the coins for 3 days, but frozen TRX can then be used to vote as Tron Power.

The Tron Power in this user's account signifies that they have 28,419 votes and by Freezing the remaining TRX can gain 7 more votes.

Users can then scroll through the SR candidate list and select BeatzCoin and cast votes.

Rank	Candidate Name	Follower Count	Votes
#32	TeamTronics	48,250,915	0
#33	Tron-Europe	30,017,746	0
#34	WINTokenCommunity	8,428,182	0
#35	TarquinRealEstate	5,433,198	0
#36	BeatzCoin	4,946,635	7

Once your votes are set and confirmed you will start receiving TRX and BTCZ rewards.

Download the **TronWalletMe** app
for iOS and Android
